

REPAIR CLAMP (SNAP)

FEATURES:

- Suitable for ductile iron, steel, fiber cement, PVC (up to DN70)
- Working pressure: 16 bar
- The gasket partially covers the inside of the band, allowing the repair of:

MATERIALS:

- **Body:** Stainless steel AISI 304 or AISI 316L
- **Studs:** Stainless steel AISI 304 (M10 upto DN25 and M12 for the rest)
- **Nuts:** Stainless steel AISI 304 or AISI 316 with a molybdenum coating
- **Washers:** Stainless steel
- **Gasket:** NBR or EPDM

DIMENSIONS:

REF	DN	RANGE	L	STUDS	TORQUE *
4200	15	15 - 22	75	M10	60-80
4201	20	21 - 25	75	M10	60-80
4202	25	26 - 30	75	M10	60-80
4203	25	33 - 37	75	M10	60-80
4204	25	37 - 41	75	M10	60-80
4205	25	42 - 45	75	M10	60-80
4206	40	48 - 51	75	M10/M12	60-80
4207	50	60 - 64	75	M10/M12	60-80
4208	70	87 - 93	75	M12	60-80

* These torque values are recommended, although they depend on the coefficient of friction of the studs and the presence of lubricants
